## **DETAILED ACTION**

### ***Priority***

Applicant has not complied with one or more conditions for receiving the benefit of an earlier filing date under 35 U.S.C. 120 as follows: A review of co-pending applications 09/151,471 and 09/151,530 to which applicant claims priority, did not provide information to support the claims of the instant application. Therefore, in regards to the applicant's request for priority to the above applications, the request is denied.

### ***Information Disclosure Statement***

The information disclosure statement filed 10/6/2000 fails to comply with 37 CFR 1.98(a)(2), which requires a legible copy of each U.S. and foreign patent; each publication or that portion which caused it to be listed; and all other information or that portion which caused it to be listed. It has been placed in the application file, but the information referred to therein has not been considered. The applicant states that the information can be found in co-pending application 09/151,471 and 09/382,422. A review by the examiner of this case file showed that documents D1 –D14 were not made available and were therefore not considered. All of the domestic and foreign patents were reviewed and considered as noted on the attached 1449.

### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claim 1-30 are rejected under 35 U.S.C. 102(e) as being clearly anticipated by US 6,311,214 B1, herein referred to as Rhoads.

In regards to claims 1-24, Rhoads teaches, "a printed object, such as an item of postal mail, a book, printed advertising, a business card, product packaging, etc., is stenographically encoded with plural-bit data (i.e. bar code). When such an object is presented to an optical sensor, the plural-bit data is decoded and used to establish a link to an Internet address corresponding to that object." (Abstract). Rhoads also teaches the use of an encoded credit card used to make purchases online (col 27, lines 40-55).
